

PO UG

1. Acquires the ability to understand and analyse the problems.
2. Develops the skill to think critically on abstract concepts of Mathematics.
3. Analyse the situation, make a mathematical problem and find its solution.
4. Enhance logical reasoning skills, aptitude skills, communication skills, self-confidence for better employability.
5. Provides a systematic understanding of the concepts and theories of mathematics and computing their application in the real world.
6. Acquires the ability to critically interpret numerical and graphical data, to read and construct mathematical arguments and proofs.
7. Formulates and develops mathematical arguments in a logical manner.

PSO UG

1. Develops problem solving skills.
2. Understands the basic concepts of advanced mathematics.
3. Creates mathematical models.
